PROFILE

Informatics student at Hogeschool Leiden with a Software Developer diploma completed in one year instead of three. Over 2 years of professional experience as a software developer at Superscanner, where I work alongside my studies, focusing on web scraping and data processing. Strong background in software engineering and eager to apply skills in an international environment.

WORK EXPERIENCE

- 2023 - Present
 - Superscanner - Software Developer**
 - Develop and maintain distributed web scraping infrastructure processing 5M+ products daily across 160+ crawlers for supermarket pricing data.
 - Build and optimize data pipelines using PHP/Laravel, MySQL, Redis, Elasticsearch, and Docker to ensure high availability.
 - Collaborating with a team of developers to extend functionality and ensure data accuracy and reliability.

EDUCATION

- 2024 - Present
 - Hogeschool Leiden**
 - BSc Informatics (Computer Science)
 - Propedeuse obtained cum laude
- 2022 - 2023
 - Nova College Haarlem**
 - MBO Software Developer
 - Completed in 1 year instead of 3
