- Learning Japanese

LANGUAGES

PROFILE

Informatics student at Hogeschool Leiden with over 2 years of professional experience as a Software Developer at Superscanner. I work on developing and maintaining web scraping systems and data processing infrastructure that handle millions of product records daily. Interested in backend development, distributed systems and solving technical problems.

WORK EXPERIENCE

● 2023 - Present

Superscanner – Software Developer

- Develop and maintain distributed web scraping infrastructure processing 5M+ products daily across 150+ crawlers for supermarket pricing data.
- Build and optimize data pipelines to ensure reliable and efficient processing of large product datasets.
- Work with a team of developers to expand scraping capabilities and improve data accuracy and reliability.
- Monitor crawler performance using charts and logs to detect issues and ensure reliable data collection.

EDUCATION

● 2024 – Present

Hogeschool Leiden

- BSc Informatics (Computer Science)
- Propedeuse obtained cum laude

● 2022 – 2023

Nova College Haarlem

- MBO Software Developer
- Completed in 1 year instead of 3
